PAUL J. SCHRADER, P.E.
SUPERINTENDENT

CHARLES G. STEPANEK
DISTRICT MANAGER

NOTICE: WATER MAIN REPLACEMENT

As part of our ongoing Capital Improvement Program, the District will be installing new water mains and fire hydrants within the Pembroke Avenue and Tobin Road areas. The work will require service interruptions. Barring emergencies, every effort will be made to provide twenty-four hour advance notice prior to any service interruption. During scheduled shut downs, residents are advised to keep a jug of water in their refrigerator for drinking and to fill a bathtub with water for toilet flushing.

Discolored water from main shutdowns should also be expected. District personnel will be flushing hydrants during the course of the work to help minimize this problem. If you experience discolored water, please flush water through your cold-water faucets until clear. Do not attempt to flush your home's plumbing through the hot water faucets as you will draw rusty water into your hot water heater. Do not run your clothes and/or dish washers when work is scheduled for your area.

During excavation it may be necessary to temporarily close roads. We ask that all homeowner's to keep their cars in driveways if possible and to drive with caution. The contractor is responsible to maintain ingress and egress of driveways during the progression of the work.

After the new main is put into service, small excavations near the curb line of each home's property will be required to attach each service pipe to the new water main. Homeowners can expect a brief service interruption during their service transfer. At the completion of the project, damaged lawn areas will be repaired with topsoil and seed.

The District will be replacing all service pipes within the public right of way. Homeowners will be notified if their service pipe is found to be lead or iron. We strongly recommend that these lines be replaced by the owner.

The installation work is scheduled to begin on or about April 2, 2018. The staging of materials and heavy equipment can be expected. We appreciate your patience and understanding with regards to this work. Please call Paul Schrader at 466-4416 ext. 715 should you have any questions or concerns.

Very truly yours,

The Board of Commissioners,
Manhasset-Lakeville Water District

MANHASSET-LAKEVILLE WATER DISTRICT

PEMBROKE AVENUE AREA WATER MAIN IMPROVEMENTS

2018

WATER MAINS WILL BE REPLACED ON THE FOLLOWING
